Background Content

- First, we needed to find what direction our campaign was going to take to improve sleep quality.
- Through our research, we found that exposure to blue light 1-2 hours before bedtime had a significant impact on the quality and quantity of sleep.
- Blue light exposure decreased melatonin production, increased REM (rapid-eye movement) sleep, and caused disruptions in the circadian rhythm. Long-term consequences include sleep deprivation, insomnia, mental disorders, and even increased cancer risk (Tahkamo et. al).
- From our research, we determined that we should target the amount of screentime participants have before bedtime. We decided to ask participants to turn their phones off one hour before they go to sleep.

Background Audience

- Our main target audience was College students in the University of Maryland College Park.
- College students are a demographic that is susceptible to negative consequences due to high levels of stress and academic, social, and familial pressure.
- Colleges have started to incorporate more electronic assignments and tools, which encourages more screen time and more blue light exposure.
- A survey was conducted among the college students with 103 participants

Background Audience - Survey

Target Audience - Mainly UMD College Students

72.8%

Always use their phones before bed

63.5%

Use their phones for at least 1 hour

Before

65%

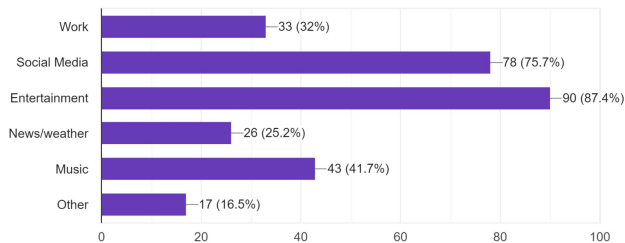

Use their phones laying on their bed

The majority believe that phone use affects their sleep quality

103 Participants
40.8% female
58.3% male
0.9% other

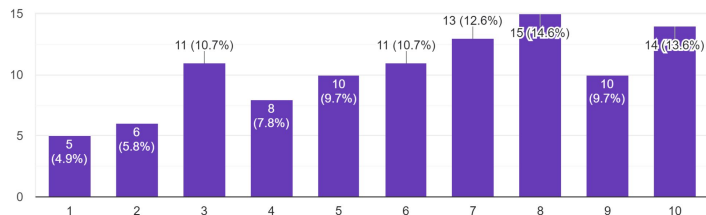

Why do you use your phone for before bed? (Check all that apply)

103 responses

How much do you think your nighttime phone usage affects your sleep?

103 responses

Only **17.5%** of participants were willing to put their phones away 1 hour before bed while **53.4%** were somewhat willing

Dissemination

- The campaign encouraged people to **put away their phones an hour before bed** to test for better sleep
- Students know sleep is affected by screen time and understand the need to limit it
- Exposure to our campaign could help the student make **a conscious choice**
- We made **easy to read and eye catching posters** to attract students attention
- Created an instagram page and QR code for **easy accessibility** to helpful tips

Sleeping Tips

1. Stick to a consistent sleep schedule
2. Create a comfortable sleep environment
3. Limit screen time before bed
 4. Exercise regularly
 5. Limit daytime naps
6. Practice relaxation techniques

Reminder

Turn off your phone tonight.
You'll thank yourself tomorrow.

Tabling

Post-It Responses

" Slept amazing 9 hours "

“Decent but stressed”

"Went to bed at 1am woke up and 10:30am, felt good :)"

"5 hours but not well stressed"

" 2 hours :("

“ Not too bad + about 6.5 hours ”

Evaluation

Our Methods of Outreach:

- Word of Mouth
- Instagram
- Tabeling Event
- Preliminary and Wrap up Survey

What was successful:

- Tabeling event
 - Provided the most interaction and conversation regarding sleep
 - Sticky notes allow for visual representation of exposure
 - Instagram
 - Allowed for a passive form of communication
 - Instagram analytics allow for easy observation of interactions
- 

Evaluation

What we did wrong:

- Lack of preparation
- Little face to face interactions
- Our campaign is not very identifiable
- Campaign lost momentum after first couple weeks
- Lack of adequate time for survey response
- Lack of response on Chipotle Event

Limitations

- We are college students with full course loads
- Students do NOT like to be approached
- Members of our group have different schedules/conflicts
- Students are not perceptive to our mission statement

What Would We Change?

Fixing our exposure:

- Conducting a tabling in a different location would allow for a greater number of exposures
- Putting up interactive posters to see who was interacting with our information around campus
- Posting more information on our instagram

What we could do with funding:

- Create sponsored posts on Instagram/buy advertisements
 - Purchase incentives for interacting with our tables (i.e. pens, stickers, raffle prizes, etc.)
 - Expand past UMD and target more people
 - Organize a campus event that aligns with our campaign
- 

Thank you!
